### • Decoding Data, Property Features

**2025-26-27**

### THEORY OF THE CASE

- Document is **not** a watermark
- Prints "VOID" on front when duplicated
- Patterned background highlighting security elements
- Two-tone colors on front and a layer of security
- Security printing is provided on front of checks
- Field placed on front is heat-sensitive and disappears if subjected to heat or touch
- Watermark on back can be seen when check is held on an angle
- Copy-machine will on watermark disappears (color when reproduced with a color)
- Check verification summary is part of the watermark
- Microtext print contains the Document name and is difficult to copy
- Anti-spoof backer displays security of information
- Environment same prints "VOID" when duplicated
- Security features that help tamper-resistant attributes
